

M. P. SHAH HOSPITAL

VACANCY

M P Shah Hospital is looking to recruit an ambitious and career driven person for a vacancy in the following position:

CARDIAC CATHETERIZATION LABORATORY NURSE

The Nurse will be responsible for assisting physicians in all procedures, monitor patients' pre and post procedures and conduct patient and family education related to the procedures.

Key Responsibilities & Duties:

-
- Ensure patients are adequately prepared for procedures and that documentation is up to date.
- Assist the physician to perform procedures, and administer the necessary medication.
- Monitor patients during and after procedures.
- Maintain high standards of infection prevention and control as per the hospital policies and procedure.
- Educating patients and their families on relevant health problems and care after procedures.
- Maintain accurate documentation of the procedures and medication given in the laboratory.
- Interpret laboratory results or cardiac tests and take appropriate action.
- Report unusual findings/incidences to the Cardiologist/Physician in charge.
- Safely dispose of waste in accordance with the Hospital's guidelines on waste management.
- Discharge assigned patients according to hospital protocol.
- Assist in emergency nursing procedures necessary for prompt control of changes in patient's physical condition.
- Participate in data collection and monitoring of identified unit based quality indicators.
- Perform duties with flexibility in the assigned clinical area and within the hospital setting.

Minimum Requirements:

- RN from a recognized school of nursing or University.
- Current licensure with the Nursing Council of Kenya.
- 2 years of continuous clinical nursing practice.
- Certification or Experience in Critical care and Emergency Nursing is an added advantage
- Certification in Basic Life Support (BLS) and Advance Cardiac Life Support (ACLS).

Interested candidates are kindly encouraged to forward their CVs and application letters to recruitment@mpshahhosp.org on or before 3rd July, 2017.
