

**M.P. SHAH HOSPITAL**  
A Legacy of Care

# The M.P. Shah Hospital

## Launch of the Village Medical Centre

# The M.P. Shah Hospital 'Legacy of Care' Progresses to the Village Market Mall

After eight successful decades of providing health services to the people of Kenya with distinction, The M.P. Shah Hospital is pleased to unveil its first satellite clinic – The Village Medical Centre.

This milestone follows years of intensive research and thoughtful discussions with stakeholders, particularly patients, who are constantly in demand for convenient high-quality and affordable healthcare.

The medical facility is located on the second floor of the Village Market Mall, new wing, and has ample space to encourage true multidisciplinary treatment. It accommodates a full spectrum of medical disciplines, including:

- Casualty
- Paediatrics
- Radiology and Imaging
- Day care theatre and suites,
- Cardiology
- Pharmacy
- Dialysis
- Chemotherapy
- Metabolic Balance
- Laboratory
- Dentistry
- Optometry and Ophthalmology

The services have been tailored to address the increasing demand for highly specialised care in Kenya and the East

**Mrs. Toseef Din**  
Chief Operating Officer

African region.

Our laboratory is equipped with modern technology, which is run and used by a team of qualified and well-trained staff.

Through radiology and imaging, a service in which The M.P. Shah Hospital has become a national reference, The Village Medical Centre is able to provide the highest quality of radiology images that enable easy diagnosis of diseases through Magnetic Resonance Imaging (MRI), CT-Scan, Ultrasound and X-ray.

The facility identifies dialysis as a key service priority for people with kidney function problems. Not only

has the service increased the current number of dialysis centres in the country, but also enhanced renewed enthusiasm amongst patients, who for a long time, have grappled with the discomfort of long journeys.

The specialty clinics at the new centre are devoted to providing preventive, rehabilitative and curative care with emphasis on the physical, psychological and social aspects of the patient, their family and the community.

Other key elements of the centre revolve around optimising patient

safety and infection control.

The opening of the new medical facility is part of the expansion vision of the hospital, which has already seen the opening of a dedicated paediatrics facility in the main hospital in Parklands, Nairobi.

Through strategic partnerships, The M.P. Shah Hospital is continuing to increase its presence with the view of making access to healthcare more convenient to patients; living up to the reputation of “a legacy of care” and giving a new option for high-quality and affordable care.

## Our dream to spread healing has come alive

**Message from Dr. Manoj Shah, HSC  
Chairman, M.P. Shah Hospital Board of Governors**

Today is a moment of joy and pride not only for the board of governors, management and staff of The M.P. Shah Hospital, but for the rest of our esteemed customers and the entire country.

This dream has come to its fullest culmination after years of hard work, focus and commitment to achieving noble goals. It has taken dedication and substantial investment from the Hospital and its donors who have been interested in this vision.

Our health services have indeed a long and honourable history in this country.

The M.P. Shah Hospital, an institution celebrating 88 years of existence, has made a major contribution in healing the nation and restoring lives.

In recent years, we have become more and more concerned with the access to quality healthcare, which has eluded many citizens. We are now on an unstoppable journey to implement convenient high-quality and affordable healthcare.

Our vision is to provide

exceptional and compassionate services which are inspired by the people we serve and their communities. We have aligned our service offerings to ensure that they remain responsive to patients' needs.

We hope the new Village Medical Centre will be a great facility in restoring one of the greatest possible gifts in life – health.

It exploits technological innovation in improving health outcomes in a way that

cements with the government's Big Four agenda on health and United Nations' Sustainable Development Goals (SDG) number 3, which advocates for good health and well-being.

In 1948, the World Health Organisation (WHO) defined health as a “state of complete physical, mental and social well-being and not merely the absence of disease.” The M.P. Shah Hospital has been mindful of the importance of securing the well-being of citizens by complementing the global body's effort in reducing and controlling preventable diseases such as malaria, cancer and HIV/AIDS.

We look forward to undertaking this journey forward with an aim to realise the hospital's vision.

**We are now on an unstoppable journey to implement convenient high-quality and affordable healthcare”**

**Message from Dr. Manilal Dodhia  
Vice-Chairman, M.P. Shah Hospital Board of Governors**

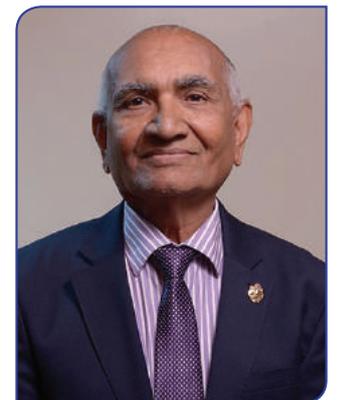

It gives us great pleasure to be able to honour our obligation to officially open the beautiful and historic Village Medical Centre. As a hospital, we feel very blessed that we have managed to expand exponentially to the point of having a modern fully-fledged hospital outside our main address in Parklands.

This important step again reaffirms our commitment to building a system that delivers value through maximisation of quality and removing the burden of access, which has been a major setback in service delivery. It also demonstrates our dedication to create tailored solutions that make the greatest difference to patients.

Over 80 years have passed since The M.P. Shah Hospital was established. The experience gained during this period not only underscores why many families have trusted us for generations, but also explains why the plan to establish a satellite clinic has come of age.

With the opening of this new clinic we are charting a course towards sustainable health solutions across Kenya by bringing affordable international standard services to the people.

A key interest of the M.P. Shah

Hospital is to advance life by providing a broad range of high performance solutions that address patient needs.

The new facility is an exciting one and we are pleased that The M.P. Shah Hospital has intensified its efforts to promote quality health care.

We also applaud our staff and supporting partners, many of whom have made this success possible and will make future successes possible as we continue to work together to fulfil our vision.
